

## ACHIEVE OPTIMUM SCENT THROW WITH YOUR NEW DIFFUSER...

---

First things first, make sure you position your diffuser in a safe place away from pets and small children, on a dry, flat surface. We recommend positioning your diffuser in a place that gets lots of traffic, this will help to diffuse the scent and achieve optimum scent throw. Also, make sure you rotate your reeds every 48 hours, this ensures your scent diffuses equally and your reeds are not over saturated.

Most importantly enjoy your new reed diffuser...
